Explanatory Notes of the Expert System Group for the year ended 31/12/2015
EXPERT SYSTEM GROUP

Explanatory notes to the consolidated financial statements for the year ended 31/12/2015

Form and content of the financial statements

The consolidated financial statements as at and for the year ended 31/12/2015, comprising the balance sheet, income statement and explanatory notes have been drawn up in compliance with Italian Legislative Decree No. 127/1991 supplemented, with regard to the aspects not specifically envisaged by the decree, by the national accounting standards published by the Italian Accounting Body (OIC) and, in the absence thereof, by those of the International Accounting Standard Board (IASB) and the Financial Accounting Standards Board (FASB); they are accompanied by the Report on operations. They are also accompanied by the following documents:

- List of the companies included in the consolidated financial statements and of the equity investments;
  - Companies consolidated line-by-line (pursuant to art. 26);
  - Other equity investments in subsidiaries and associates;
- Statement of reconciliation between shareholders’ equity and profit/(loss) for the year of the parent company and the corresponding consolidated balances;
- Cash flow statement.

The amounts are expressed in units of Euro.

The financial statements of the companies included in the scope of consolidation have been drawn up by the respective management bodies on the basis of the accounting standards mentioned above.

Exceptions

No exceptional cases were identified that required recourse to the exceptions set forth under art. 29, sections 4 and 5 of Italian Legislative Decree No. 127/1991.
Scope of consolidation - Consolidation and translation principles

The consolidated financial statements comprise the financial statements of EXPERT SYSTEM SPA and of the Italian and foreign companies over which it directly or indirectly exercises control.

Note that, unlike the consolidated financial statements as at 31 December 2014, the scope of consolidation has changed as a result of the following transactions:

- Expert System Iberia S.L.U. has been included in the consolidated financial statements of the Expert System Group for the first time in 2015, following its incorporation in December 2014;
- the acquisition of 100% of TEMIS S.A., a French leader in text analytics solutions with branches also in Germany, the USA and Canada. This transaction began with the signing of a binding agreement in May 2015 and closed on 23 September 2015, the reference date for inclusion of the investee’s economic and equity values in the scope of consolidation.

The assets and liabilities of the consolidated companies are included on a line-by-line basis. The book value of the equity investments held by the parent company and by the other companies included in the scope of consolidation is eliminated against the related shareholders’ equity. The difference between the purchase cost and the shareholders’ equity at current value of the investee companies as of the date control is acquired is distributed, where possible, to the assets and liabilities of the investees; any remaining difference, if positive, is recognised in the item “Consolidation difference” under intangible fixed assets and amortised on a straight-line basis over a period of five years in relation to the estimate of the period in which this value will contribute to the production of economic results.

If an excess of the shareholders’ equity is recognised with respect to the acquisition costs, after having possibly reduced the values of the fixed assets and having established the “Consolidation provision for future risks and charges” for estimated liabilities, this would be credited to consolidated shareholders’ equity under the item “Consolidation reserve”.

The following companies have been excluded from the scope of consolidation: ADMANTX SPA, with headquarters in Naples, which the Group directly controls, and ADMANTX INC with headquarters in the USA, which the Group indirectly controls.

The equity investment in ADmantX S.p.A. as at 31/12/2015 is not considered functional with regard to the group’s objectives and in fact, since the last quarter of 2014, scouting activities have been underway via a specialised advisor for the purpose of identifying a strategic partner, of an industrial
and/or financial nature, to whom a significant or total holding in the company may be transferred, which permits ADmantX to more fully express its potential on a market such as that of ADTech which has features and methods very different from the Expert System business model.

The financial statements of the foreign companies are translated into Euro according to the following criteria:

- the assets and liabilities at the exchange rate in force as of the period end date;
- the income and expenses by applying the average of the period exchange rates;
- the shareholders’ equity components at the rate in force in the related formation period.

The exchange differences deriving from the conversion of the closing shareholders’ equity using the original formation exchange rates with respect to those in force as of the balance sheet date are booked directly to shareholders’ equity, together with the differences between the economic result expressed using the average exchange rates and the economic result expressed in Euro using the exchange rates in force as of the end of the period to the item “Translation reserve”, included under the item “Other reserves”.

The payable and receivable items and those concerning costs and revenues between the companies included in the scope of consolidation, are eliminated.

The annual financial statements of the individual companies approved by the shareholders’ meeting or drawn up by the Board of Directors for approval, have been reclassified and adjusted if necessary to align them with the accounting standards adopted by the Group.

**Measurement criteria**

The measurement criteria adopted for the drafting of the consolidation financial statements are in line with those used by the parent company, supplemented where necessary by the accounting standards adopted for specific consolidated financial statement items.

The measurement of the individual items is carried out on a prudent basis, with a view to the business as a going-concern, and taking into account the economic function of the asset and liability elements on the basis of the principle of prevalence of substance over form.

The measurement criteria adopted are unchanged with respect to those used in the previous year. In particular, the measurement criteria adopted were as follows.
**Intangible fixed assets**

Intangible fixed assets are recognised at purchase or production cost, inclusive of any accessory charges, and are amortised systematically in relation to the residual possible useful life, possibly written down if as at the year end date the estimated recovery value of the fixed assets is permanently lower than the cost.

**Tangible fixed assets**

Tangible fixed assets are recognised at purchase or production costs net of the related accumulated depreciation, including all the costs and accessory charges directly attributable.

The cost is revalued in accordance with monetary revaluation laws and, in any event, does not exceed the market value.

The cost of the fixed assets whose use is limited over time is systematically depreciated each year on the basis of the economic-technical rates established in relation to the residual useful life.

In the event that, irrespective of the depreciation already recognised, permanent losses in value (impairment) are registered, the fixed assets are written down in relation to the residual useful life. If the reasons for the write-downs no longer exist in subsequent years, the original value is written back.

Fixed assets in progress and payments on account to suppliers are recorded under the assets on the basis of the cost incurred and/or the payment on account made inclusive of the directly attributable costs.

**Non-current financial assets**

Equity investments in associates are measured at cost.

The other equity investments and other securities are recognised at purchase and/or subscription cost, inclusive of accessory charges, and are written down in the presence of permanent losses in value (impairment), calculated taking into account the respective listings as well for listed securities.

**Current financial assets**

Securities held over the short-term for investment have been measured at purchase/subscription cost or the value taken from market trends, whichever is the lower.
**Inventories**
Contract work in progress has been measured adopting the percentage of completion criterion. The costs, revenues and the job profit are recognised on the basis of the production progress status. For the application of this criterion the hours worked method is adopted.

**Receivables**
The receivables are recognised at estimated realisable value via allocation to the bad debt provision, recorded as a direct deduction from the asset and determined in relation to the risk of loss emerging from specific analysis of the individual positions and in relation to the past performance of the losses on receivables, as well as the country risk.

**Current financial assets**
The equity investments and securities which do not represent fixed assets are recognised at purchase cost or estimated realisable value taken from market trends, whichever is the lower.
The receivables recorded under financial assets are stated at estimated realisable value. This value has been established by adjusting the face value of the existing receivables so as to take into account all the risks of non-collection.

**Cash and cash equivalents**
Cash and cash equivalents at year end are valued at face value.

**Accruals and deferrals**
Accrued income and prepaid expenses, and accrued expenses and deferred income are recognised on an accruals basis.

**Provisions for risks and charges**
Provisions for risks and charges are set aside to cover losses or payables which are certain or likely to exist but, in respect of which, the amount or date of occurrence cannot be determined at year-end. The provisions reflect the best possible estimate on the basis of the elements available.
The pension provision is established to cover the commitments accrued at period end vis-à-vis those
with the right to a pension.

The provision for taxation includes the deferred tax liabilities associated with consolidation adjustments, when the effective manifestation with regard to one of the subsidiaries is probable.

**Employee severance indemnity**

This reflects the liability, subject to revaluation by means of specific indices and net of the advance paid out, accrued by all the employees of the Group at year end, in compliance with the provisions of the law and current employment agreements.

**Payables**

Payables recognised under balance sheet liabilities are stated at their face value, deemed representative of their discharge value.

**Criteria for the translation of amounts stated in foreign currency**

Receivables and payables outstanding at the end of the year, originally expressed in currencies of countries not complying with the Euro, are expressed in the financial statements at the exchange rate in force at the end of the period. Profits and losses on the translation of the receivables and payables mentioned above using the exchange rate as of the balance sheet date are respectively credited and charged to the income statement.

**Commitments, guarantees and risks**

The commitments and guarantees are indicated in the memorandum accounts at their contractual value.

Amounts have been set aside in the specific provisions for risks in relation to which manifestation of a liability is certain or probable.

The risks for which the manifestation of a liability is only possible are described in the explanatory notes without making any provision for risks.
Costs and revenues
These are stated on a prudent basis in accordance with the accruals principle.

Income taxes for the year
Current income taxes are recognised, for each company, on the basis of the estimate of the taxable income in compliance with the rates and current provisions as of the period end date in each country, taking into account any applicable exemptions and the tax credits possible due.
Prepaid and deferred taxes are calculated on the temporary differences between the value assigned to an asset or liability in the financial statements and the corresponding values recognised for tax purposes, on the basis of the rates in force at the time the temporary differences will reverse. Prepaid taxes are only recognised if reasonable certainty exists with respect to their future recoverability.

Information on the Balance Sheet

Intangible fixed assets
Intangible fixed assets amount to € 18,539,026 (€ 4,639,955 in the previous year).
The breakdown and the changes in the individual items are presented as follows:

</table>

Information is provided below on the most significant changes during the year:
1) the increase in “Start-up and expansion costs” of € 477,974 is mainly associated with:
- € 356,142 for the business reorganisation of Expert System USA Inc. in terms of subdividing the Corporate and Federal market business between Expert System USA Inc. and Expert System Enterprise Corp., respectively, which was arranged after the acquisition of the latter company;
- € 64,119 for the formation expenses of Expert System Iberia SLU, represented by legal consulting costs for support in the introductory stages and due diligence costs;
- € 57,491 for the start-up costs of Expert System USA Inc. in relation to the recruitment of new personnel and setup of the sales network during the start-up of sales operations;

2) the increase in “Research and development costs”, totalling € 5,815,868, can be broken down as follows:
- € 3,033,114 as the capitalisation carried out by the parent company of costs relating to employees and costs for external consultancy used in research and development, illustrated in detail in the explanatory notes of Expert System S.p.A.;
- € 2,418,115 as the research and development costs of the subsidiary Expert System Iberia S.L.U., which was not included in the scope of consolidation as at 31 December 2014;
- € 364,639 as analogous to the item recognised by Temis SA, which was also not included in the scope of consolidation at the end of the previous year.

3) the increase in “Goodwill” of € 1,462,211 comprises goodwill recognised under assets of the subsidiary Expert System Iberia S.L.U. following acquisition of the business unit of Isoco at the time Expert System Iberia S.L.U. was incorporated;
The total book value of € 1,183,146 comprises:
- € 1,169,769 the goodwill of Expert System Iberia S.L.U., net of € 292,442 amortisation,
- € 13,378 the goodwill recognised among parent company assets, net of € 20,066 amortisation.

The “Consolidation difference” is the difference between the acquisition cost of equity investments and the present value of shareholders’ equity at the date of acquisition of the subsidiaries included in the scope of consolidation. This difference, generated at the time of netting the book value of the equity investments held by the parent company against the shareholders’ equity of the consolidated subsidiaries, was recognised under intangible fixed assets and is amortised on a straight-line basis for 5 years. In particular, the total of € 9,000,042 was calculated as follows:

- € 6,778,449 (net of € 1,694,612 amortisation) from the consolidation into the Expert System Group of the subsidiary Temis SA;
- € 110,313 (net of € 27,578 amortisation) from the consolidation into the Expert System Group of the subsidiary Expert System Iberia SLU;
- € 2,111,281 from the sub-consolidation into the subsidiary Temis SA of its own subsidiaries:

<td><strong>1,047,933</strong></td>
<td><strong>1,036,992</strong></td>
</tr>
</tbody>
</table>

The increase in “Other intangible fixed assets” of € 1,042,573 is attributable to the subsidiary Temis SA, which was acquired in 2015. This total largely refers to text mining solution software for the pharmaceutical industry included among Temis SA assets following the acquisition of I Cube on 3 June 2013.

In relation to the matters laid down by art. 38.1, letter d) of Italian Legislative Decree No. 127/1991, the breakdown of the start-up and expansion costs and research, development and advertising costs is illustrated in the following tables.

</tbody>
</table>

The costs recorded are reasonably correlated to long-term benefit over several years, and are systematically amortised in relation to their residual useful life.

**Tangible fixed assets**

Tangible fixed assets amount to € 915,731 (€ 692,064 in the previous year).

The breakdown and the changes in the individual items are presented as follows:
The item “Other assets”, which includes the residual values which cannot be classified in the previous items, amounts to € 511,849 (€ 269,834 in the previous year). The increase is mainly due to the subsidiaries Expert System Iberia SLU and Temis SA not being included in the scope of consolidation as at 31 December 2014.

**Non-current financial assets - Equity investments**

The equity investments not included in the scope of consolidation, since they are irrelevant or carry out activities dissimilar to those of the group, included under non-current financial assets amounted to € 364,811 (€ 386,955 in the previous year).

The breakdown and the changes in the individual items are presented as follows:
The decrease in “Equity investments in subsidiaries” is due to elimination of the investment in Expert System Iberia S.L.U. of €46,144 following the consolidation of this subsidiary.

However, as regards the change in equity investments in associates, the increase of €26,000 is due to the inclusion of professional consulting costs relating to purchase of the equity investment in CY4Gate S.r.l., which as at 31 December 2015 was therefore recognised for a total of €307,673.

Lastly, the change in “Equity investments in other companies” is due to zeroing out of the book value of the investment in Semantic Valley S.r.l., which filed its post-liquidation financial statements on 30 December 2015. After this adjustment, the total of €57,138 recognised in the financial statements as at 31 December 2015 can be broken down as follows:

<table>
<thead>
<tr>
<th>Equity investment</th>

<td>50,000</td>
</tr>
</tbody>
</table>

The item “Receivables due from associates” includes the amount relating to an interest-bearing loan
disbursed to CY4Gate S.r.l. in 2015 to support the investee during the start-up phase. That amount includes € 12,521 in interest accrued in 2015 on the total loan originally disbursed for € 390,000.

The breakdown of changes in this item is as follows:

<table>
<thead>

Report on Operations of the Expert System Group for the year ended
31/12/2015
Report on Operations of the Expert System Group for the year ended 31/12/2015

Structure and activities of the Group

The Group, led by the parent company Expert System S.p.A., is today one of the world’s major players in the big data text analytics sector, in which it develops semantics software useful in strategic data management, i.e. able to extract quantities, relations, sentiment and categorisations from enormous amounts of data. As part of a constantly developing organisation that has seen an exponential growth in the quantity of available data, the total said to include around 80% of unstructured data, the solutions offered by Expert System and centering on the Cogito platform qualify as potential sources of competitive advantage and a business development tool.

In 2015, in order to offer its technology on the global market where major competitors already operate, Expert System has aimed to further develop its international reach by, on the one hand, expanding its semantics software products with new releases in Chinese, Korean and Japanese as a preamble to potentially opening up new opportunities on the Asian markets, and on the other through a mix of organic growth and corporate acquisitions.

As part of this internationalisation strategy the binding agreement was signed in May 2015 and the transaction closed in September for the acquisition of 100% of TEMIS S.A., a French leader in text analytics solutions with branches also in Germany, the US and Canada. As a result of this acquisition, the Expert Group now directly or indirectly includes the following business entities:

<table>
<thead>
<tr>
<th>COMPANY</th>

<td>Semantic software activities in the Information technology field</td>
</tr>
</tbody>
</table>
As already reported in the consolidated financial statements as at 31 December 2014, Expert System considered it appropriated to continue excluding ADmantX from the Group’s scope of consolidation.

The aforementioned acquisitions were followed by the opening of new laboratories dedicated to R&D, the true driver for the Group’s growth. Two of these are in the USA (Palo Alto - Silicon Valley, and Washington), confirming that innovation is considered and indispensable strategic asset in support of the Group’s global growth. These new laboratories will work in synergy with the other “Cogito Labs” (Modena, Rovereto, Naples, Grenoble and Madrid), encouraging cooperation between the various work groups to increase Cogito potential and continue creating the best applications for automatic understand of text-based data.

In view of this, it can be claimed that the Expert Group is today a European leader in the cognitive computing sector, its leadership also recognised by its customers and industry analysts. For this reason, it should be remembered that the independent research company Forrester, globally recognised as one of the most authoritative in the business and technology environment, has rewarded Cogito’s unique potential, including the company in its latest report dedicated to the top ten big data text analytics companies (Forrester Wave™ Big Data Text Analytics Platforms, Q2 2016: The 10 Providers That Matter Most And How They Stack Up) after examining another 200 companies. In particular, Expert System proved distinguished for its “product scalability, use of intuitive interfaces
and semantic functions as the core elements of products to offer full management of all activities associated with text analysis: data enhancement, tagging, automatic document classification and big data extraction”.

The Group plans to continue on its chosen growth path, following the directives of its management, which aims to further develop:
- the local presence;
- the support capacity;
- the technological product mix.

Since February 2014 the Company has been listed on the AIM Italia (Alternative Investment Market) - MAC, i.e. the Borsa Italiana market dedicated to Italian small and medium enterprises with high growth potential. These businesses operate in different sectors, with digital comprising 20% of the 72 companies now listed, for a total equity funding of € 715 million and a market capitalisation of more than € 2.9 billion. The AIM listing has allowed Expert System to attract new specialist investors and has facilitated the internationalisation process referred to previously.

The performance of the share as at 26/05/2016 is presented below:

The graph showing share performance from the IPO (18/02/2014) to 26/05/2016 is presented below:
Operating condition, business development and Group structure

Both at global level and in Italy, the year ending 31 December 2015 recorded significant growth of “Global Big Data and Text Analytics”, the market in which Expert Systems operates, given the increasing global interest in Artificial Intelligence and Cognitive Computing. More and more companies are seeking advanced technology tools to support a wide range of business activities, from marketing and sales to finance and control, IT systems, purchasing, production and the supply chain. Future prospects, as confirmed by high-level studies and research, also see positive developments for the sector, with strong growth rates forecast for the coming years.

So as to best satisfy market demands and expectations, the Expert Group has boosted its technological research and development, backed by suitable expansion of its distribution channels, for example by building a network of international partners able to act as distributor and system integrator of the Cogito product line. It is in this context that major partnership agreements have been signed with Italian and international entities, including:

- the partnership with Cloudera, one of the rising companies on the Californian vendor scene;
- the technology partnership agreement signed with Google, which as part of its “Work for Partner” programme has extended the capacity and functions of its Google Cloud Platform using Cogito technology;
- the integration of Cogito® semantics technology into the Google Search Appliance (GSA), which earned Expert System the title of “Premier Technology Partner” in the special programme dedicated to solutions for businesses, with particular reference to research
activities (Google for Work - Search). This title is reserved exclusively for companies capable of demonstrating the highest level of technological expertise and services based on successful innovative implementations;

- the integration of the Cogito platform into products developed in the MongoDB environment. MongoDB is the US leader in latest generation database design;

- as part of the innovative start-up support project, the partnership with Buzzoole, the first native content platform for businesses which chose Cogito to offer its customers the opportunity to optimise digital marketing activities, including the sense of the information underlying every campaign.

- the agreement signed with Nana Bianca, the accelerator for technology businesses in the web and Internet sector, to aid the growth and development of new high-technology value companies and thus for activities and projects designed to encourage growth of the Italian innovative ecosystem by supporting the setup and acceleration of digital business start-ups.

- the partnership with I3P, the Innovative Business Incubator of Turin Polytechnic, which provides support to digital start-ups with a proven capacity for growth.

It is considered that this type of initiative, which not only creates interesting links with innovative and emerging companies, can, in the medium-term, also deliver economic results, should these start-ups be successful in their various sectors.

The greater visibility achieved in 2015 is also associated with new product launches, created to satisfy new and specific market demand, including:

- the specific technological product for the banking and insurance sector, for which Cogito API Finance was released, the first vertical API for banking and insurance sector needs which combines the wealth of finance sector taxonomies and ontologies with enhancement of natural language processing and semantics analysis;

- the launch towards the end of 2015 of Cogito Risk Watcher, the software based on Cogito semantic intelligence able to provide businesses with useful information for managing their supplier and third party risk profiles, and therefore guarantee greater security in terms of financial, credit, compliance and reputation profiles. This product derives from thorough analysis of the strong turbulence and volatility of today’s global economic situation, and the growing need to be able to understand, correlate and automatically summarise, with maximum
precision, all external or internal information of the company, identifying events, hidden
relations and other significant information to ensure risk mitigation and prompt detection of
threats by detecting data that can mitigate a variety of different risks.

All the goals achieved in 2015 also earned Expert System major recognition from leaders operating
in the Information Technology sector. The previously mentioned Forrester Research included
Expert System in its “Techradar” study dedicated to risk management. In its report, Forrester
includes the technologies proposed by Expert System among the 13 most important for risk
management with respect to the various stages of market maturity and different business values,
using a proactive approach capable, where necessary, of adopting suitable remedial action, together
with self-reporting activities. Added to this recognition is Expert System’s inclusion in the “Vendor
Landscape: Big Data Text Analytics” report, dedicated to describing the most effective big data
management solutions based on text. This report provides a list of companies specialised in
business information management, selected on the basis of the degree to which their product mix
is vertical, their coverage of market domains and the technological approach, for example linguistic
rather than statistical analysis, able to provide practical indications by identifying useful
relationships within large masses of data.

Another important award came from EContent, one of the most prestigious American digital
publishing magazines, which recognizes the value of Expert System’s API product by including
Cogito API in the “EContent Magazine’s 2015 Trendsetting Products List”. This list was compiled
by EContent Magazine’s editorial staff on the basis of the unique nature of companies’ products,
with particular reference to publishing content management, communications and marketing.
Approval of the consolidated financial statements

The consolidated financial statements as at 31/12/2015 were approved by the Board of Directors on 27 May 2016 and audited.

Operating performance

The operating performance as at 31 December 2015 shows a loss of € (3,284,307), but in order to provide greater transparency and comparability of the information, the main consolidated income statement figures for 2015 (value of production, revenues, EBITDA, EBIT and result for the year) were prepared pro-forma in order to represent the consolidation with effect from 1 January 2015 of TEMIS (the acquisition of which was finalised in September 2015) as summarised below.

The value of production amounted to € 30 million with sales and service revenues of € 22 million (+84% on 2014) as a result of stronger sales on foreign markets, particularly € 9.5 million from the new companies included in the scope of consolidation (former TEMIS and Iberia). The overall portion of revenues from foreign sales was € 12.8 million, equal to 58% of total revenues. Also note the major investments made in France, the USA and Spain, which show an increase in R&D of +79% compared to 2014. EBITDA, standing at € 1.8 million, was associated with the strong investments in technical and sales personnel (+156% compared to 2014) both in Italy and in the rest of the Group. EBIT, negative at € 3.5 million, indicates the effect of amortisation (+68% on 2014) of the company’s strategic assets. The result for the year was a loss of € 2.3 million.

With reference to the effective consolidated financial statements figures, so including the results of consolidating the former Temis Group from 23 September 2015, the following tables provide a reclassification of the added value income statement, a reclassification of the balance sheet and the more significant financial ratios.
Main income statement figures

The company’s reclassified income statement is shown below (in Euro):

</tbody>
</table>

The increase in the value of production was positively impacted by the stronger sales on foreign markets, particularly the amount referring to the new companies included in the scope of consolidation (former TEMIS and Iberia). The overall portion of revenues from foreign sales was €7,195,460 million, equal to 43% of total revenues.

The significant investments made in favour of future company growth, concentrated mainly in France, the USA and Spain, are reflected in the stronger impact on the income statement of the depreciation of strategic tangible assets and the amortisation of strategic intangible assets, and also in the increase in personnel costs, most of which in the development and sales areas. All of the above have compacted into the present the margins it is believed can show positive developments over the short-medium term. Revenues from the first important contracts obtained on foreign markets will contribute to this; first and foremost the United States, where the strongest and most expensive efforts are focused on encouraging the start-up of business operations.
In terms of providing a better description of the company’s profits, the table below outlines certain profitability ratios.

</tbody>
</table>

The net financial position increased both in the short and the medium-long term, since the company
financed its own investments in R&D and sales development, in addition to the acquisition of new equity investments through recourse to the banking system and to other lenders, to which the bond loan issued in 2015 was offered. The company borrowing policy is compatible with the time horizon in which returns are expected on the investments referred to in the plan.

In the last year, the short-term balance was also consolidated, as seen from the increase in net working capital which compares current assets and liabilities. This figure, therefore, was not affected in any way by the significant investments to consolidate the Group’s expansion, as confirmed by a considerable growth in fixed assets which doubled over the last 12 months.

The table below also shows certain financial statement ratios relating to both (i) the methods of financing medium/long-term investments and (ii) the breakdown of sources of financing.

</tbody>
</table>

The Capital assets and related fixed assets to equity ratio express how the company manages to finance its fixed assets.

The Fixed asset/equity margin and its associated ratio, which correlate the value of shareholders’ equity with fixed assets (as quantified in the table above), provide us with information on the company’s capacity (or not) to finance all fixed assets with its own equity.
The negative result of the fixed assets/equity margin with the correlated ratio at less than one indicates that in order to meet its long-term financial commitments the company must, for the moment, seek third party financing (financial indebtedness).

The fixed assets/liabilities and equity margin and its related ratio instead also use medium/long-term liabilities as reference.

The environment, personnel and risks

Pursuant to art. 2428 no. 1 of the Italian Civil Code, information is provided below in relation to the environment, personnel and risks.

Personnel

During the half-year there were no workplace fatalities for registered employees and no serious
accidents occurred in the workplace causing serious or very serious injury to registered employees. Furthermore, there are no recorded charges concerning occupational diseases of employees or former employees, or mobbing proceedings.

During the half-year, the parent company carried out investments in personnel safety in compliance with Legislative Decree 81/08, involving the provision of training to all personnel on the safety of workers and supervisors. In addition, refresher courses were also provided to first aid personnel and members of the fire safety team.

The Environment
In the first half of the year there was no damage to the environment for which the group was ultimately declared guilty. During the year, no sanctions or penalties were imposed upon our group for environmental offences or damages.

Risks
Pursuant to art. 2428 no. 1 of the Italian Civil Code, the main risks to which the company is exposed are as follows:

*Risks associated with trade receivable collection times:* Expert System’s business activities are characterised by customer payment timing that cannot easily be determined and can occasionally be several months, also in relation to the type of assignment and the contingent general economic situation. Any lengthening of payment times by customers can lead to Expert System needing to finance the related current capital needs. Such situations can therefore have a negative effect on the Group’s income, equity and financial position. The above takes on further significance in consideration of the extent of trade receivables due from European public entities. These receivables can have longer and more difficult to predict collection times compared to receivables due from private customers. Though as part of its normal operations Expert System makes use of bank credit facilities and, for the future, is studying expansion of its operating market to private international customers, it cannot be predicted at this time that there will be no positions difficult to collect.
Risks associated with the internationalisation: The Group has initiated an internationalisation process in the hope that an appreciable part of its revenues can be generated from sales outside Europe. In particular, the American market is a major area to be monitored, with the aim of raising the number of customers served and, consequently, the market share held. In this respect the Group companies could be exposed to risks typically associated with operating at international level, including those relating to changes in local economic conditions, policies, taxes and regulations together with risks associated with the complexity of conducting business in distant geographic areas, as well as those linked to changes in foreign exchange rates versus non-EU countries. Unfavourable events occurring in such areas could have negative effects on the Group’s business and growth prospects, and on the income, equity and financial position of the Company and/or the Group.

Risks associated with related party transactions: The parent company has concluded commercial and financial transactions with related parties, and as part of its operations could continue to do so. Expert’s main relations with related parties refer primarily to commercial transactions such as technical and/or sales consultancy, administrative services contracts and leases. The financial contracts instead refer mainly to loans disbursed by Expert System S.p.A. to Group companies. In particular, last April Expert System adopted an intercompany financing plan which envisages the parent company’s disbursement to subsidiaries of loans of an amount sufficient to provide them with the funding necessary to meet their expense and investment commitments. The intercompany financing plan offers subsidiaries a simpler way to obtain funding on the market and therefore overall facilitates execution of the Group’s business plan. All the transactions performed were at arm’s length.

Risks associated with the protection of intellectual property rights: To protect corporate value, the Company has registered the Expert System and COGITO trademarks. COGITO has also been patented in the United States. Though the Company has implemented the necessary measures to protect its intellectual property rights, it cannot be excluded that in the future third parties could perform activities that violate such rights, with negative effects on the Company’s and/or Group’s business and growth prospects and on the income, equity and financial position of the Company.
and/or Group.

**Research and development activities**

Pursuant to art. 2428.2.1 of the Italian Civil Code, the following information is provided:

The company is constantly conducting research and development activities to retain its global leadership position in the field of semantic technology. The costs incurred for these activities were capitalised, also within the context of certain multi-year national and international research projects that have seen the company's involvement. These activities concerned the Cogito semantics platform and related functions, in particular the Cogito platform for French, Chinese, Japanese, Korean, Portuguese and Russian, as well as further development of Cogito Studio, the implementation of new deep learning algorithms and automatic domain word recognition.

Other significant research developments in the period were the semantics mapping between different languages, the creation of new advanced multi-dimensional browsing methods for large volumes of text, and a new boost to the development of Analyst Workspace.

**Significant events after the close of the year**

We report that the following new important agreements were signed after the close of the year.

Among these, note that at the start of 2016 the Corriere della Sera digital archive was launched, an innovation expected to redefine Italy's news panorama as a result of the unique capacity of Expert System semantics to provide automatic classification of articles according to content and to recover them through a sophisticated search engine. Consequently, readers of this leading Italian newspaper now have the option of browsing a wealth of information without precedent: 2.5 million pages, 8 million articles, 22 thousand authors from 1876 to date, 140 years of history just one click away.

Consistent with the mission of simplifying operations for its customers, FinecoBank has also chosen Expert System technology for its ability to make customer support processes more efficient, signing an agreement for the use of Cogito technology that allows bank-customer dialogue through digital channels and optimisation of customer service activities.

Highly important for the expansion of the medical research sector and pharmaceuticals industry, on the other hand, is the trade agreement signed with INSERM, the French national institute for health
and medical research. Through the application of text analytics developed by Expert System for the healthcare and pharmaceuticals industry, Inserm will be able to more rapidly analyse scientific documents to precisely and efficiently identify the best talent in the pharmacological environment, selecting the profiles best qualified for the drug assessment and review committees (formed of three to five experts).

Of note in the finance sector was the decision of Prometeia, a well-known econometrics research association, which chose Expert System to enhance its Wealth Management platform in order to improve the investor profiling process and subsequent advisory tasks provided to them. The system installed means that intermediaries can provide their investors with a rapid and accurate analysis of their needs, diagnosing their wealth status and highly-personalised consulting, and also making it possible to offer a wide range of new services of high added value.

Expert System and Onix, the US company specialising in IT solutions for the corporate and government sectors, have also begun a partnership based on integration of the Cogito technology into the Onix product mix. Through this new transaction, Expert System continues its international growth, extending the use of Cogito through third parties such as system integrators, highly qualified in the research of data, analysis and intelligence and strengthens its position in cognitive computing in the USA.

Another important partnership for Expert System was signed with MarkLogic, the leading US multinational in corporate databases for the management of Big Data. In fact, Cogito was integrated into the MarkLogic platform to enhance data analysis by using cognitive computing. This transaction is in line with Expert System’s international growth strategy and strengthens the Italian company’s presence in the world of the most advanced technologies for data archiving and processing.

In addition, Expert System became a partner in the Discovery 24 project, presented by Fondazione Golinelli in Bologna jointly with Nòva, the innovation and technology weekly of Il Sole 24 Ore. This project, selected to co-finance Google’s Digital News Initiative Innovation Fund (digitalnewsinitiative.com), will develop a system to search and find operating data on the most recent new results in global scientific research for businesses. The semantics tools and artificial intelligence fine-tuned by Expert System will be constantly enhanced by human input, from researchers and journalists, intending to provide output (i.e. Discovery24) which will be a high technology content journalism system with services dedicated to businesses, well-established or start-ups, and for the
business training sector.

Also in 2016, Expert System’s work was deemed worthy of several recognitions, first and foremost its inclusion once again in the list of the “100 most important knowledge management companies”, compiled by the prestigious US magazine KMWorld, the go-to source worldwide for the best technologies and most innovative experiences in the knowledge management sector. This recognition rewards companies that are distinguished for their creative approach to customer needs and for the advanced functions of the knowledge management products offered.

In May 2016, the company won the LT-Innovate Award (for Linguistic Technologies) that recognises technological innovation excellence, business potential and experience in the development of linguistic analysis-based solutions.

Lastly, the independent research company Forrester, globally recognised as one of the most authoritative in the business and technology environment, also rewarded Cogito’s unique potential, including the company in its latest report dedicated to the top ten big data text analytics companies (Forrester Wave™ Big Data Text Analytics Platforms, Q2 2016: The 10 Providers That Matter Most And How They Stack Up).

During 2016 the enhancement of Cogito and the main tools for creating linguistic-semantic rules will be accompanied by new releases and new products, focusing in particular on the intelligence sector, banking and insurance services, the publishing industry and the pharmaceutical industry market. Placing the combination of product innovation and market demand foremost, Expert System’s Cogito Labs - including the new labs of Palo Alto and Washington - will work on developing increasingly state-of-the-art applications that are effective and in line with customer needs.

Another important decision was that of establishing the role of Executive Vice President of the EMEA area who, operating from the Paris office, is responsible for the Group’s strategic development and growth in Europe.

**Treasury shares**

As at 31/12/2015, the parent company Expert System S.p.A. held 270,000 treasury shares.

**Marco Varone**

Expert System S.p.A. (Chairman of the Board of Directors)
INDEPENDENT AUDITORS’ REPORT IN ACCORDANCE WITH ART. 14 OF LEGISLATIVE DECREE NO. 39 OF JANUARY 27th, 2010

To the shareholders of
EXPERT SYSTEM S.p.A.

Report of the consolidated financial statements

We have audited the accompanying consolidated financial statements of Expert System S.p.A. and its subsidiaries (the “Expert System Group”), which comprise the balance sheet as of December 31st, 2015, the statement of income and related explanatory notes.

Directors’ responsibility for the consolidated financial statements

The directors are responsible for the preparation of consolidated financial statements that give a true and fair view in compliance with the Italian regulations and accounting principles governing financial statements.

Auditors’ responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (ISA Italia) drawn up pursuant to art. 11, paragraph 3 of Legislative Decree No. 39/2010. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatements.

An audit involves performing audit procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The audit procedures selected depend on the auditor’s professional judgment, including the assessment of risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation of consolidated financial statements that give a true and fair view, in order to plan and perform audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
Opinion

In our opinion, the consolidated financial statements give a true and fair view of the financial position of Expert System Group as of December 31st, 2015 and of the result of its operations for the year then ended in accordance with the Italian regulations and accounting principles governing financial statements.

Other matters

The consolidated financial statements for the year ended December 31st, 2014 were audited by the auditor in charge at the time who expressed an unmodified opinion on those statements on June 12th, 2015.

Report on compliance with other laws and regulation

Opinion on the consistency of the financial statements with the report on operations

We have performed the procedures required by auditing standard (SA Italia) N0. 720B in order to express an opinion, as required by law, on the consistency of the report on operations, which is the responsibility of the directors of Expert System Group, with the consolidated financial statements of Expert System Group. In our opinion, the report on operations is consistent with the consolidated financial statements of Expert System Group as of December 31st, 2015.

Bologna, June 10th, 2016
